To buy and own land/premises for building Grand Shri Ram Temples and places of Worship in Perth and elsewhere encompassing Yoga & Meditation Centres, Cultural Centres, Vedas Learning Centres, Multifunctional Community Halls, Community Kitchens, Art Galleries and Libraries of Ancient Books, Scripts, Ramayana and other publications .

Also spreading the good name of LORD RAMA through various events .

CONCEPT

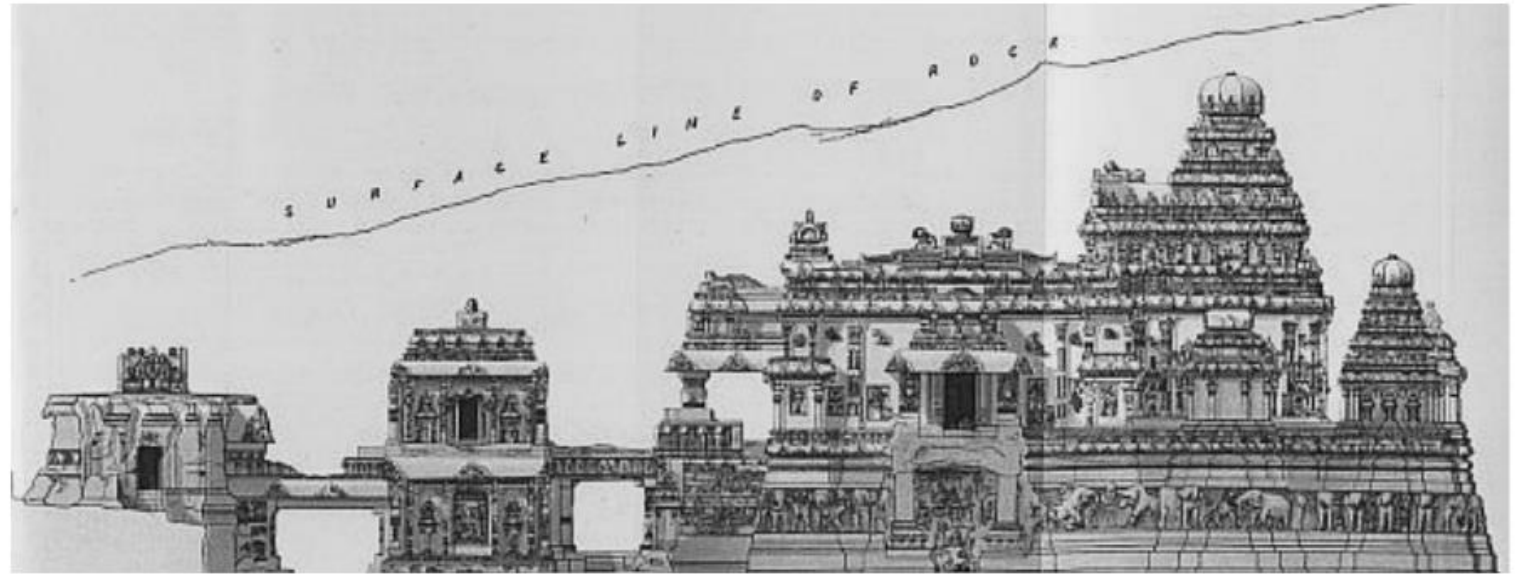

The concept of Indian Temples is built around the chakras of the human body.

The height differences from the start of the vicinity of the temple to the shikhar of the temple increases gradually just as it happens in the human body.

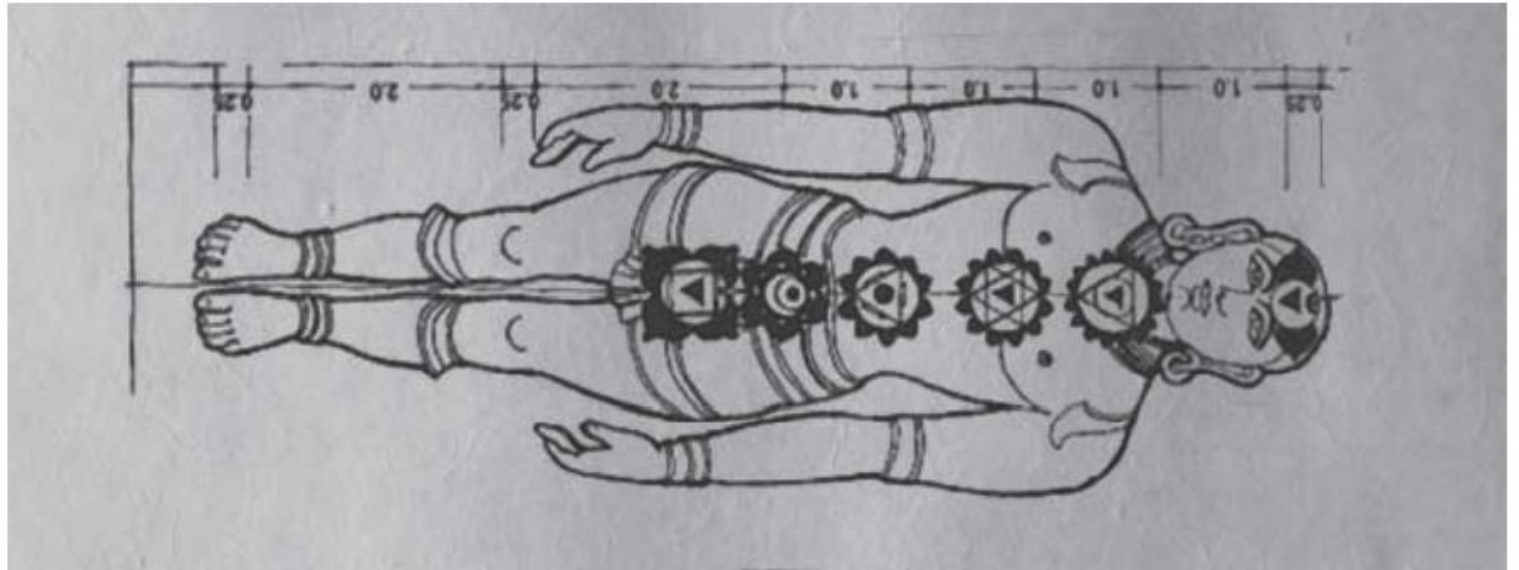

Each chakra plays an important role for achieving the sanatana and vedic life.

Just like the human body our site is divided into 7 parts representing the 7 chakras of the human body.

The whole journey of passing through all the elements of the chakras will bring you closer to enlightenment and the very roots of Indian culture learning all aspects which were considered ideal by LORD RAMA.

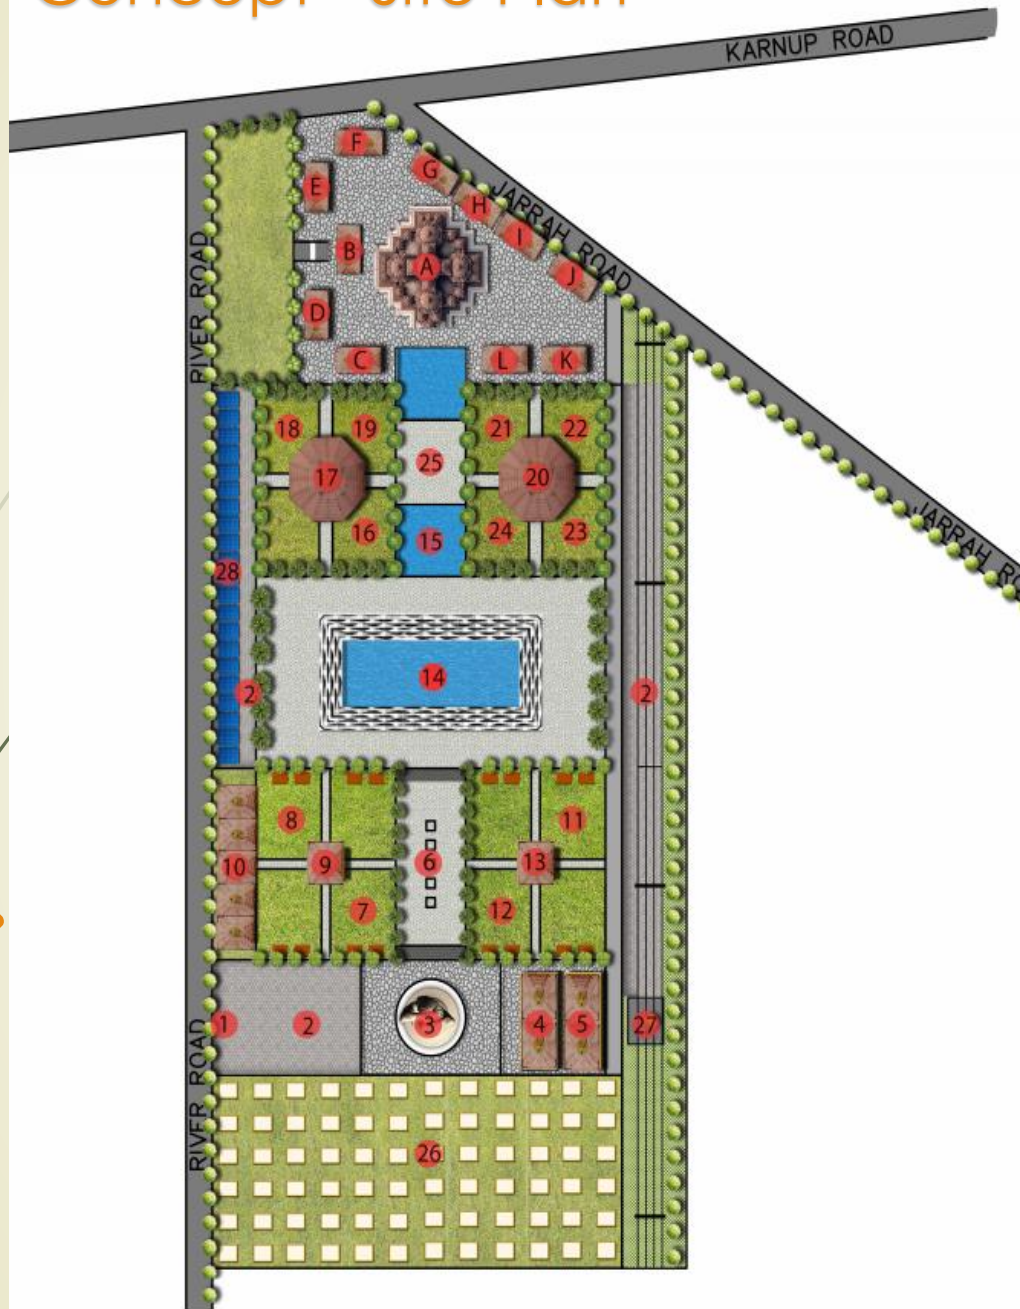

The heights of mandir increases gradually and the shikhar is the highest point.

The human body has chakras which represent different energies and they elevate just like a temple.

Concept - Site Plan

Site plan of Sri Ram Mandir ,Perth ,Australia

- L. Kush Hall

The Grand Shri Ram Mandir
will be powered by Solar albeit
"Zero Carbon Footprint"

The first image depicts the area where people can light incense sticks and enhance the environment with purity around .

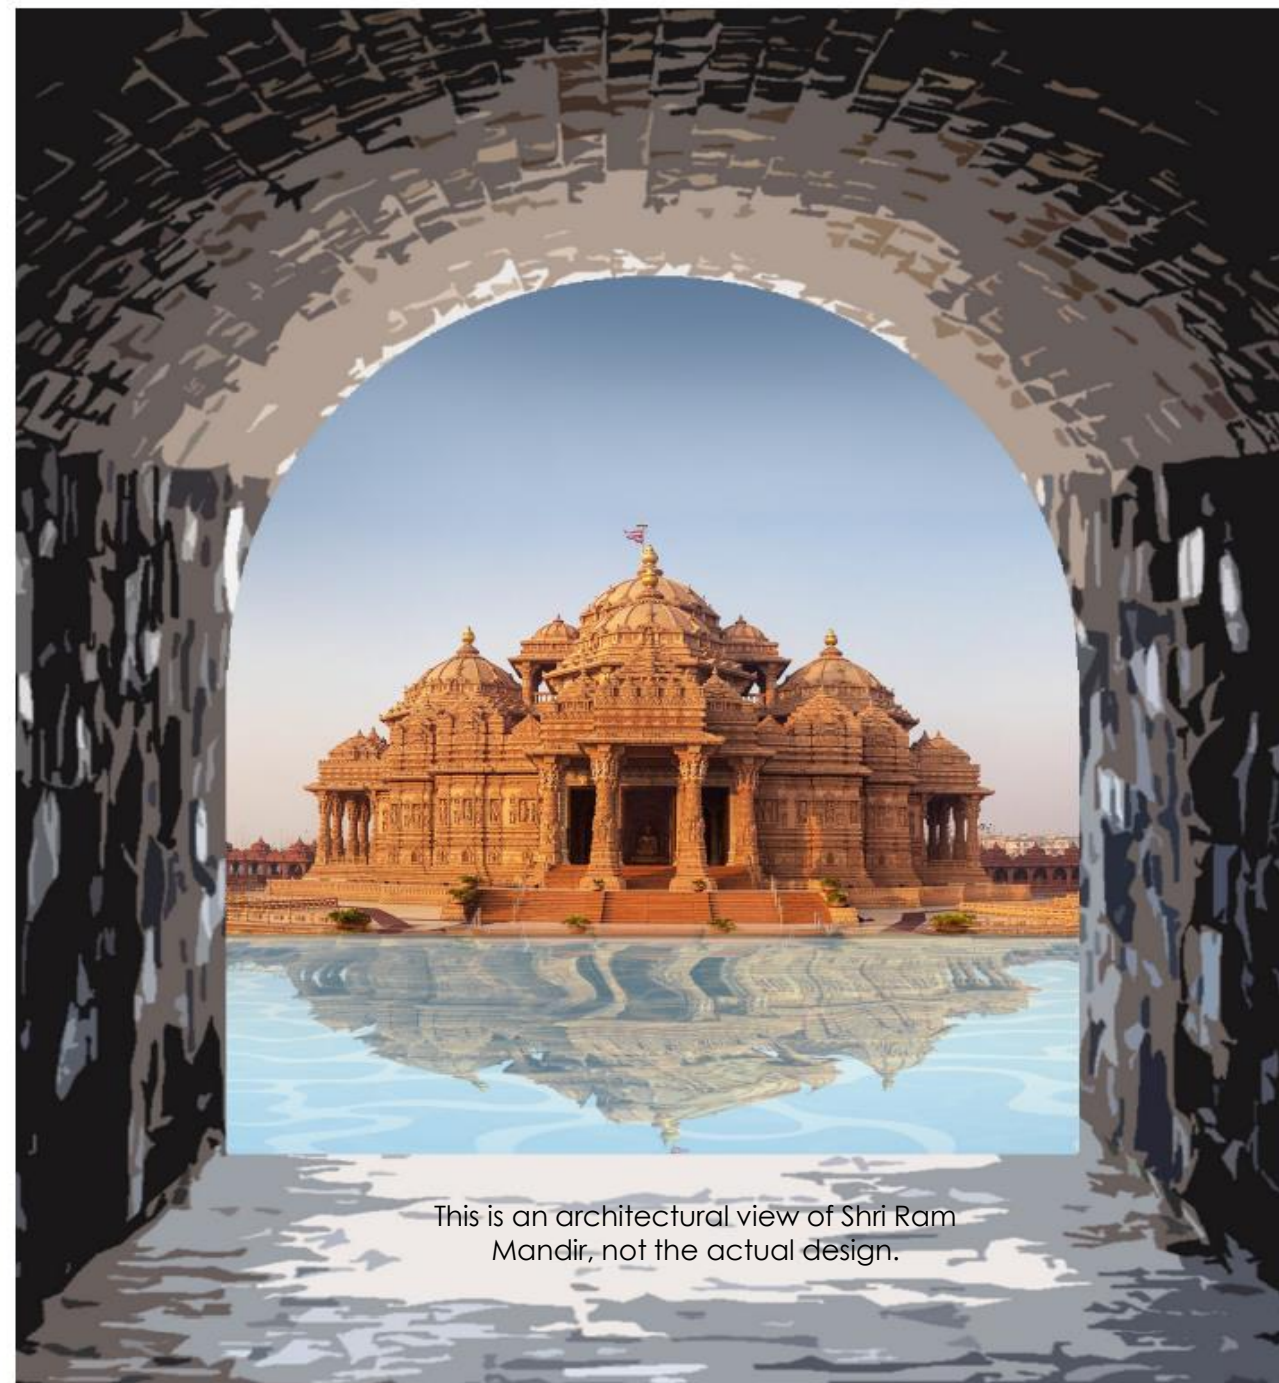

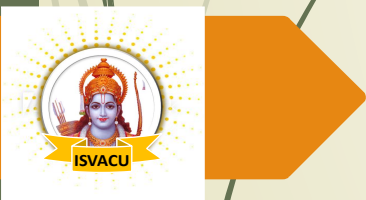

The second image depicts the area of stepwell or baori where a person can cleanse themselves of all the impurities and then go to the temple .It also acts as rainwater harvesting plant.

When you head towards the highest point of the site where the Temple is located .

You step into a waterbody which leads to a tunnel this represents one trying to discover themselves while they are in the darkest phase of their lives.

As they go further and cross the tunnel they enter again into a water body which is reflecting the temple in it and you see the light in you which represents the name of LORD RAMA.

This is an architectural view of Shri Ram Mandir, not the actual design.
